

MatCalib Pro

Material Model Calibration Report

Material card	MAT_024
Material family	Metal (ductile)
Calibration confidence	MEDIUM

Calibrated parameters

Parameter	Value	Unit
E	204969	MPa
SIGY	935.862	MPa
PR	0.3	-
RO	7.8e-09	tonne/mm^3

Engineering notes

- User-supplied values used for: RO (these override fitted values and are marked in the report).

Generated by MatCalib Pro. Calibrated parameters are derived from the supplied test data and the stated constitutive model. Verify the card in your solver before production use. This report is engineering support, not a guarantee of simulation accuracy. LS-DYNA is a trademark of ANSYS, Inc.; MatCalib Pro is independent and not affiliated with or endorsed by ANSYS.
